Sir:

In response to the Office Action mailed June 18, 2001, in the above-identified patent application, the time for response which has been extended by three months to expire on December 18, 2001, please amend the above-identified patent application as follows:

In the Specification:

Please amend the specification as follows:

Please replace the paragraph at page 4, lines 20-23, with the following paragraph:

C1
There is further provided in accordance with a preferred embodiment of the invention an image transfer member suitable for the transfer of toner images and having a non-tacky outer release coating of a condensation type silicone.

In the Claims:

Please amend claims 29, 30-34, 39-41, 66-60, 77 and 78 as follows:

sub
C2
29. An image transfer member suitable for the transfer of toner images received from a first surface and transferring them to a second surface, comprising a base layer and a non-tacky outer release layer comprised of a condensation cured silicone.

C3
30. An image transfer member according to claim 29 wherein the outer release layer has a
